學校簡介
Introduction

The University of Oulu is an international science university which creates innovation for the future, well-being, and knowledge through multidisciplinary research and education. Future innovation is about seeking, utilizing and applying new knowledge. The University of Oulu researches people and culture in a changing living environment, as well as opportunities that new technology provides for improving the well-being of people and the environment. The University of Oulu is a multidisciplinary expert in Northernness. Founded in 1958, our research and education community is 16000 students and 3000 employees strong, and one of the biggest and the most multidisciplinary universities in Finland. The research done at the University of Oulu benefits people living at all latitudes. However, our heritage as one of the Northernmost multidisciplinary universities in the world is invaluable now, when mankind's new growth frontier is to the North.

Our educational mission is to provide higher education based on research, and to educate youth to serve society and humanity. The overall aim is to further improve the quantitative and qualitative results and impact of education. Our approach is to develop education as an integral part of our scientific activity towards the following strategic aims: High-quality degree programs attract engaged students, Smooth studying processes, Modern, digitalized learning environments and pedagogic development, International studying experience, Structures supporting cooperation with working life, Systematic doctoral education.
